

Tours

Wednesday, October 11
5:30 pm - 7:00 pm

RWDI

600 Southgate Drive
Guelph

Take a tour of the test facilities at RWDI's new location in Guelph. RWDI solves complex problems in the areas of climate engineering, building performance and environment. This is supported by wind and water-based physical testing using models of unique buildings and long-span bridges. The result is buildings and infrastructure that are resilient to extreme weather, hospitable, sustainable and that meet environmental stewardship goals. The tour will show the water and wind testing tunnels and discuss the creation of models used in them. Numerous models of well-known structures will be on display.

Please Note

- Close-toed shoes are required
- No high heels
- Photos are not permitted

Carillon at St. George's Church

99 Woolwich Street
Guelph

Interested in touring a carillon? St. George's church in Guelph is home to one of only 11 carillons in Canada. Originally manufactured in England, this carillon began playing over 90 years ago. It features 36 bells that are played from a special keyboard just below the bells. Four of the bells are also used by a clock mechanism that marks each quarter hour. There will be a short talk about the carillon and of course some real carillon music. Those brave enough to climb the steep stairs will have an opportunity to see the clock mechanism, keyboard and bells in operation.
